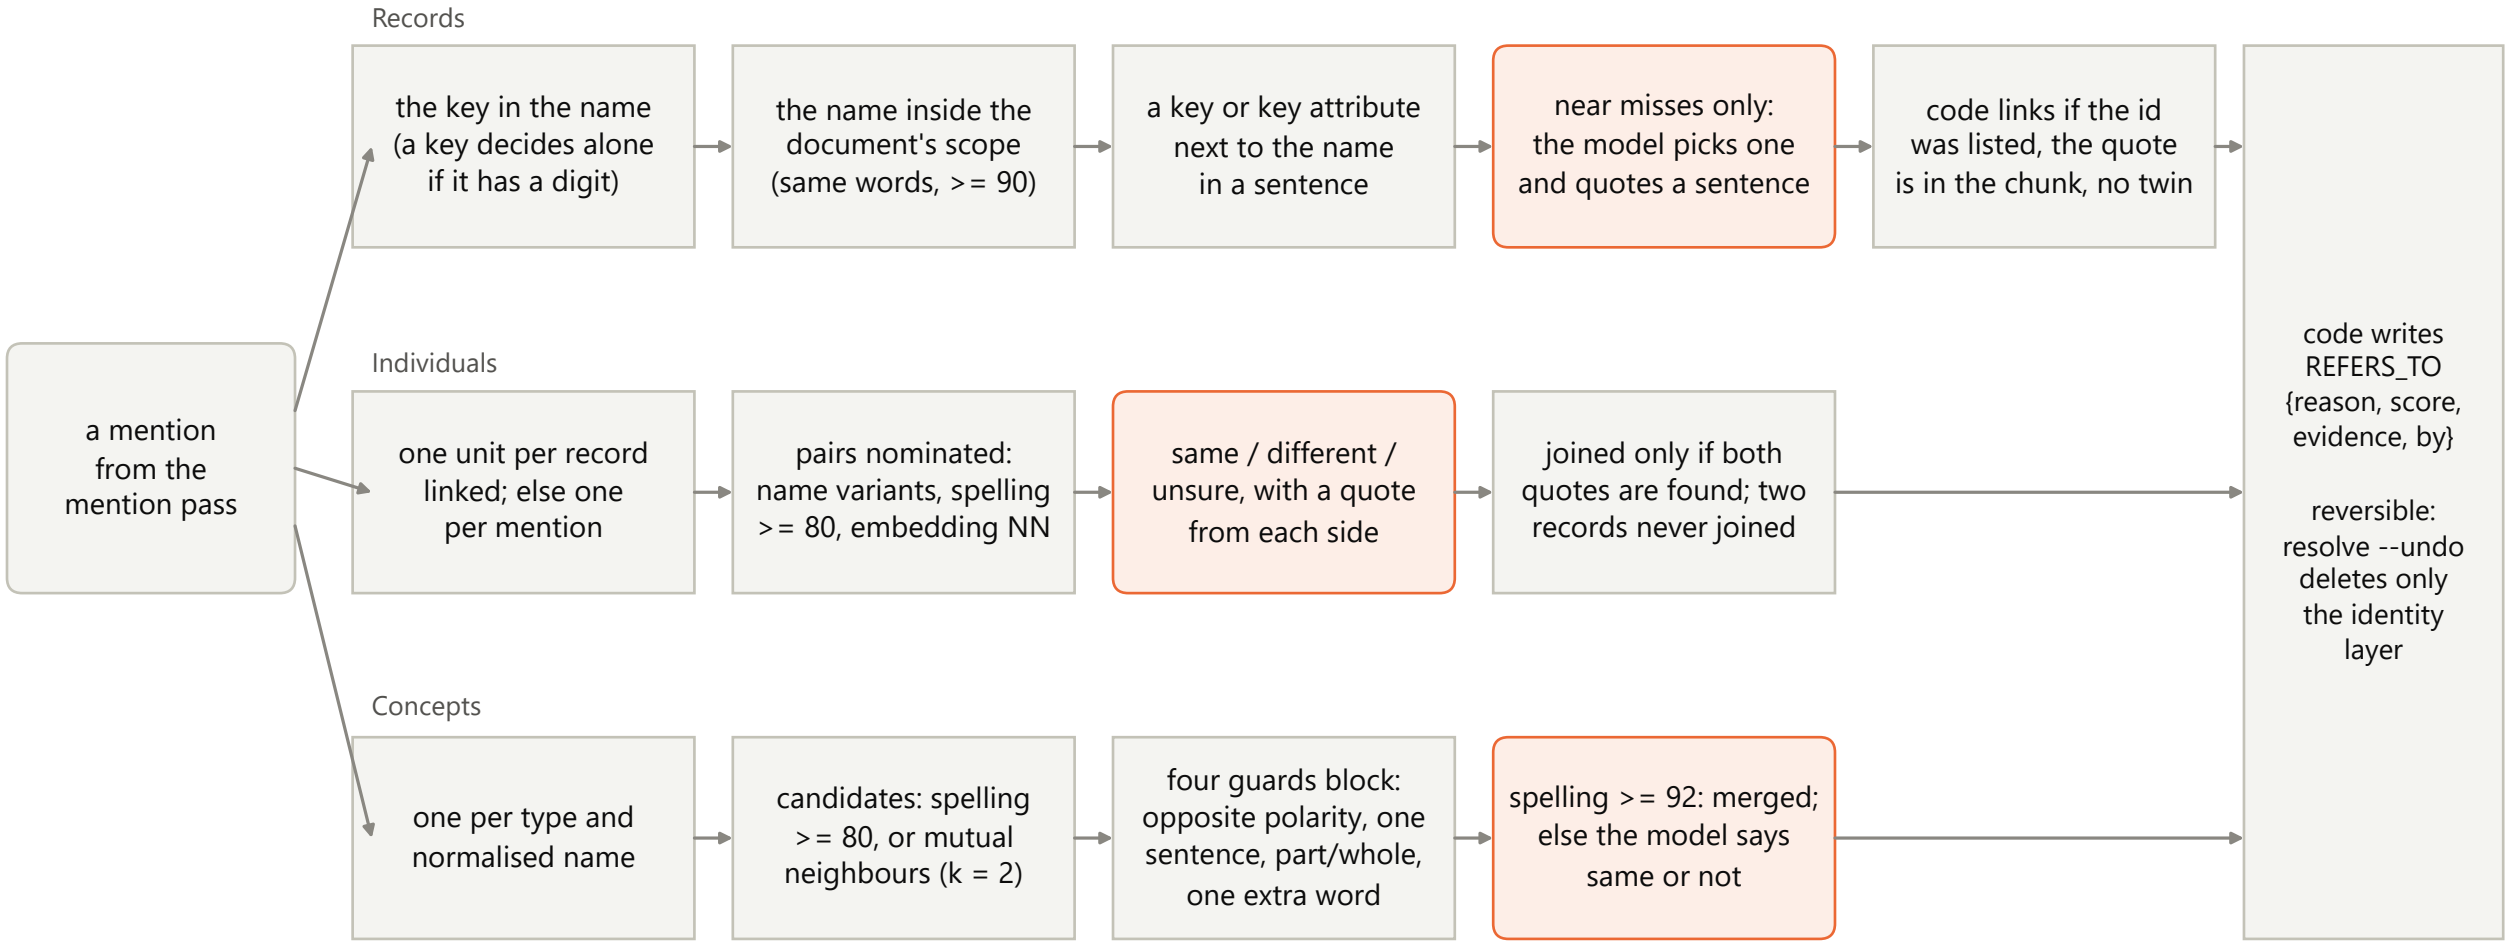
Identity: rules decide what they can; a model is asked only about near misses, and its answer counts only if its quotes are found

Resolve stage (R75-R108). Orange rounded: the model proposes; square: code decides. Thresholds are the code's settings (spelling scores are rapidfuzz token-sort ratios, 0-100).



Unlinked mentions the text states as kinds become concepts (R107). A record is never merged with another record: text only links to it.
