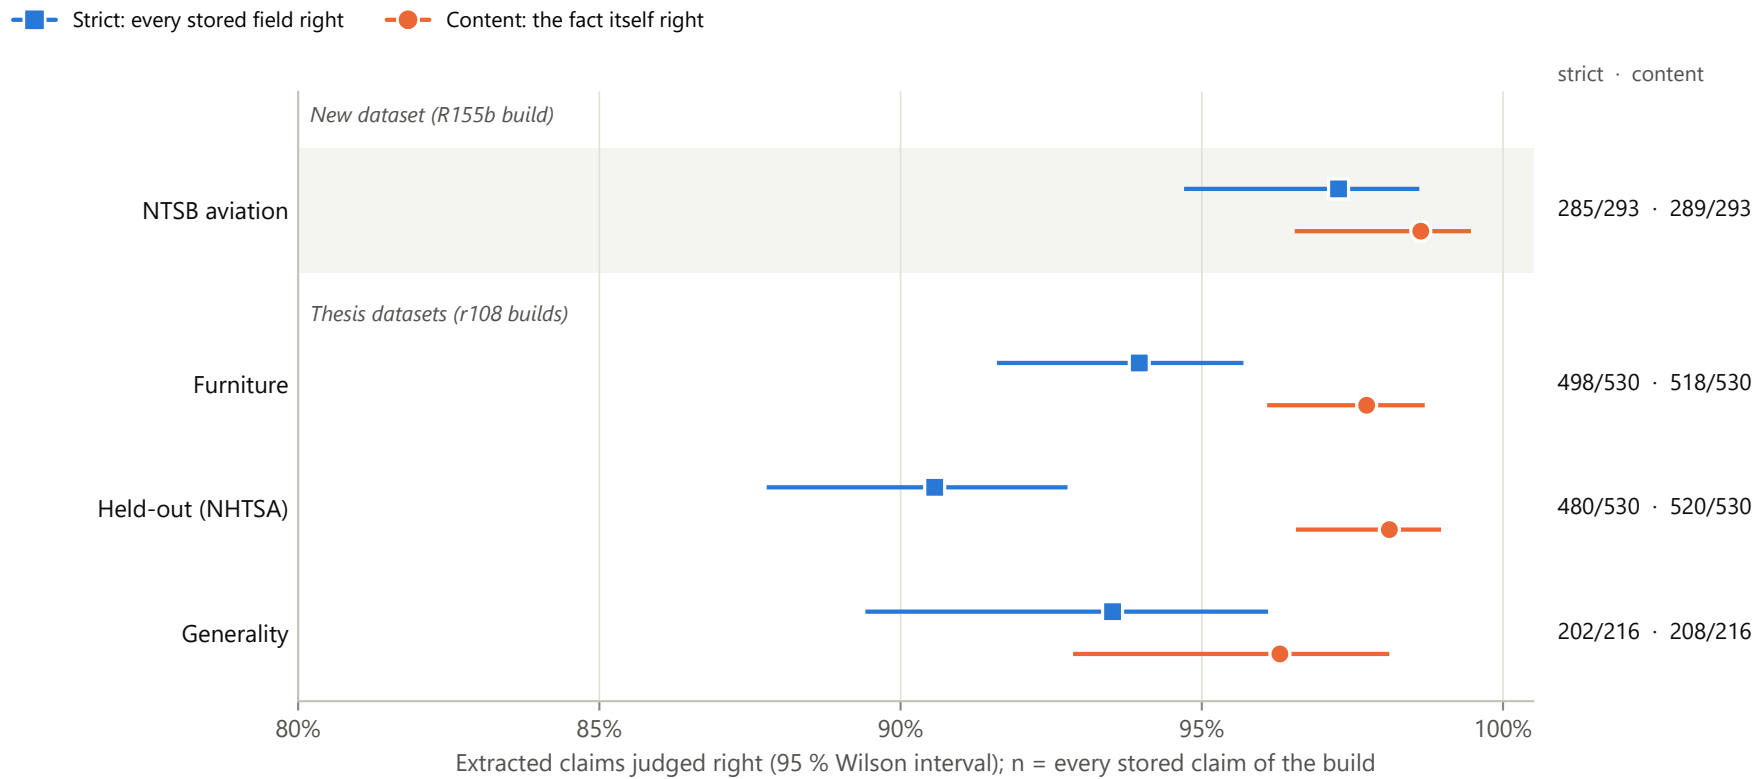
What the builds store is right: content precision 96% or more on the four datasets shown


Selected comparison of 4 of the 5 measured datasets; see the captions.
R110 (thesis datasets) and R226 (NTSB): every extracted claim judged blind against its chunk by Claude Opus 5.5. Square: strict (every field: truth, modality, condition, time, type right); circle: content (the subject-relation-object triple right). Lines: 95 % Wilson intervals; k/n at right. The axis starts at 80 %.
